ABSTRACT

Please replace the abstract that appears on page 14 of the specification with the following revised abstract which is submitted on a separate sheet.

Abstract

For simplified supply of potentiometric sensors [[1]] with a reference electrolyte [[12]], ~~the invention provides~~ a sensor plug head [[17]] for connecting to ~~[[the]]~~ a cable connection piece [[13]] of a potentiometric sensor [[1,]] is provided. The ~~with the~~ sensor plug head [[17]] including, besides the usual electric connections [[18, 19]], a supply connection for connecting to a reference container of the potentiometric sensor [[1]]. The supply connection includes, preferably, an electrolyte line [[20]] and the reference container an opening [[16]], with the electrolyte line being connectable to the opening, in order to supply the reference container with electrolyte.
